THE BUTLER LIFE LIFTING CURE, or LIFE LIFT,

IS A SERIES OF

DISCOVERIES AND PATENTED INVENTIONS.

In machinery, system, and results, it is the response of science to an extraordinary demand, — the demand for safe, systematic, complete, condensed, graduated, refined, healthful and curative physical exercise, equally adapted to all, male and female, old and young, weak and strong, the athlete and the invalid. *This process of lifting* is not like any other mode of lifting, nor is it like gymnastics, calisthenics, or any other mode of exercise. In the principles operative, and the curative results obtained, the BUTLER LIFTING CURE, or LIFE LIFT, is wholly unlike, and in many respects the *counterpart* of gymnastics, and of all kinds of dead-weight lifting, whether "shoulder lift" "lever lift," "reactionary lift," "side lift," or any other "lift." The Life Lift, by the aid of the most delicate steel springs and elastic rubber cushions, removes all harshness, produces a pleasant electrical vibration throughout the system, and makes the exercise not only safe and agreeable, but *peculiarly invigorating and vitalizing*. Unlike all other kinds of lifting, in this there is no violence, strain or shock. It is the most gentle and yet the most perfect exercise known. It soothes the nerves, relieves fatigue, equalizes the circulation, and *adjusts and invigorates the whole system*.

The secret and success of the BUTLER LIFTING CURE consists in obtaining complete and simultaneous co-operation of all the muscles, external and internal, and of the vital organs, thus securing the *perfect distribution of the vital force*. This is accomplished, first, by placing the person *centrally* over the weight, thus applying the resistance directly under the spine or *axis of symmetry*; second, by so adjusting the means of connecting the weight with the person that during the lifting effort the resistance is transferred directly to the *centre of gravity*; third, by the *intervention of elastic springs and cushions* — the weight being delicately poised and suspended on one set of springs, and the person lifting standing upon a platform resting upon another set of springs — we secure in each and all the efforts a soft, measured, graduated, cumulative, searching action, the result of the *perfect distribution of the resistance*. Thus for the first time, and by means of this true Life Lift only, we are enabled to reach the deep-seated and internal muscles, the muscular attachments, and even the walls and coatings of the vital organs, invigorating and harmonizing the action of these parts upon which health and longevity mainly depend; resulting in the most *healthful exercise, absolutely safe*, and scientifically exact, combining the *finest quality* with the *largest amount in the least time*. This is the *perfection of exercise scientifically applied*. It is capable of uniformly accurate perscription, and is cordially endorsed by eminent physiologists and physicians.
